

Testing Required Prior to and at Time of Procedure

Take this sheet, with you, to the lab to ensure that all required testing is completed.

Prior to processing and/or freezing your sperm specimen (or surgically aspirated specimen) the following tests must be RESULTED. They must be resulted as NEGATIVE and/or NON-REACTIVE to remain eligible for this procedure at this facility. If this step is not complete at the time of your appointment your procedure will be cancelled and rescheduled when all results have been completed. Please keep in mind that it can take as much as 2 weeks for these tests to be resulted!

You will be required to complete all this testing a second time within 7 days of your procedure. If you are having a sperm specimen frozen today please proceed directly to one of the phlebotomy labs and have ALL OF THE FOLLOWING TESTING COMPLETED TODAY. If you are not having the sample frozen today then this testing must be completed within 7 days of the actual freeze date. It's important that you follow through with this testing per FDA regulations. If not completed, cryopreserved sperm samples WILL NOT be able to stay in storage at our facility.

AHLTA Order Set is "Required Labs for Sperm Banking" found under Template Management, search Enterprise. When found, right click and add to favorites.

CHCS Order Set is "IVF Sperm Cryo" under IVF Set.

There are two phlebotomy labs here at WRNMMC. The closest lab is located in Bldg. 9 (Arrowhead), 2nd Floor, Rm. 2475. The overhead sign is labelled "Laboratory/Outpatient Phlebotomy". Their hours are 0700-1600, Mon. – Fri. and 0800-1300 on Sat.

The 2nd lab is located in Bldg. 19 (America), 1st Floor, Rm. 1205. Their hours are 0700-1800, Mon. – Fri.

Thank you for your cooperation.
